

Micronutrient mixture in water soluble powder

Miner-all

For soil with pH neutral to alkaline

Iron 2%, Zinc 4%, Magnesium 2%, Manganese 3%,
Boron 1.5%, Copper 0.5%, Molybdenum 0.005%, Sulfur 1.6%

- Plants without deficiencies
- Fewer yellow and dropped leaves
- Stimulation of plants
- Complete growth and high productivity
- Fewer dropped flowers

Miner-all is a micronutrient mixture for the prevention and correction of deficiencies in all plants. It is water soluble and is recommended for soil applications in neutral to alkaline soils.

APPLICATION RATE- APPLICATION

Watering the roots: 10-20 g (2-4 teaspoons) per 10 liters of water. Apply in the soil of the pot or in the ground around the shoot or the trunk in order the fertilizer to reach the roots.

Soil Application: Drench the product in the soil of the pot or in the ground around the shoot or the trunk, cover with soil and then water (*Small pots:* 3-5 g or 1 teaspoon, *Big pots:* 7-10 g or 2 teaspoons, *Bushes-Vegetables-Ornamentals in the soil:* 10-20 g or 2-4 teaspoons, *Trees-Vineyards:* 20-40 g or 4-8 teaspoons).

APPLICATION FREQUENCY: Apply according to one of the following methods every 15 days from Spring till Autumn.

PRECAUTIONS: Before mixing with any other fertilizer or pesticide, seek the advice of an agronomist. Do not apply to plants that are under stress (frost, drought, strong winds). Wash your hands after each handling. Store in a dark and cool place, away from children, pets, high temperatures and strong light. In case of contact with the eyes or the skin, flush with plenty of water. In case of swallowing or irritation seek medical advice.
