SAFETY DATA SHEET

Material Safety Data Sheet

Safety Data Sheet according to regulation No 1907/2006/EU, as it has been adjusted and is currently in vigour.

1 – Identification of the substance/mixture and of the company/undertaking

1.1 Product identifier

Product name: GROWER 30-0-0

Catalogue No.: PR.020

1.2 Relevant identified uses of the substance or mixture and non-indicated uses

Identified uses: Fertilizer

1.3 Details of the supplier of the safety data sheet

Company Identity: DEMIRTZOGLU & ASSOCIATES SA

Address: 1 Ermou & Theotokopoulou str.,

ZIP. 144 52, Metamorphosis

Telephone: +30 210 284 5891

email : info@humofert.gr

1.4 Emergency call number:

Poison Center num: +30 210 7793777

2 – Hazards identification

2.1 Classification of the substance or mixture

According to Regulation (EC) No 1272/2008 (CLP):

Serious eye damage/eye irritation (Category 2), H319

2.2 Labeling

According to Regulation (EC) No 1272/2008 (CLP):

Label elements:

Pictogram:

GHS07

Signal Word: CAUTION

Hazard Statements

H319: Causes serious eye irritation

Precautionary statements- Prevention

P280: Wear protective gloves/protective clothing/eye protection/face protection.

Issue date: 26/8/2018
3rd edition

Precautionary statements- Response

P305 + P351 + P338: IF IN EYES: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing.
P337+P313: If eye irritation persists: Get medical advice/attention.

Other information:

“It contains: **Methylene diurea**”.

2.3 Other hazards

According to Regulation (EC) No 1272/2008 (CLP):

Not known.

3 - Composition / Information on ingredients

3.1 Substance/Product:

Not applicable

3.2 Mixture

4 – First aid measures

4.1 First aid

Inhalation: Remove the victim to fresh air and let him rest in a position comfortable for breathing. If symptoms persist, seek medical advice.

Swallowing: Drink a lot of water. Do not induce vomiting. If symptoms persist, seek medical advice. Immediately call a POISON CENTER or doctor/physician.

Skin contact: Wash with soap and plenty of water. Remove immediately all contaminated clothing. Seek medical advice if necessary.

Eye contact: Rinse with water for about 15 minutes. Remove contact lenses, if present and easy to do. Continue rinsing. If symptoms persist, seek medical advice.

4.2 Most significant symptoms and impacts, acute or subsequent

Symptoms:

Inhalation: May cause respiratory irritation. There may be throat irritation.

Swallowing: Swallowing may cause nausea, vomiting and digestive irritation. There may be pain and redness in the mouth and throat.

Skin contact: Skin contact may cause redness and irritation. Prolonged or repeated skin contact may result in allergic skin reactions (e.g. dermatitis, rash)

Eye contact: May cause irritation and redness.

4.3 Indication of any required immediate medical treatment and special cure

Treat symptomatically. No specific antidote is known.

5 – Fire fighting measures

5.1 Extinguishing means

Issue date: 26/8/2018
3rd edition

Suitable extinguishing means: The product is non-flammable. Use extinguishing means suitable for the surrounding environment, such as water (spray), dry powder, foam.

5.2 Special hazards arising from the substance or mixture

In case of fire harmful gases may be produced, such as nitrogen oxides.

5.3 Recommendations to the firemen

In case of fire put on a suitable fire-extinguishing-protective equipment a self-contained breathing apparatus.

Additional information: This product is not combustible. During fire extinction take into consideration the local circumstances and the surrounding environment. Contaminated fire-extinguishing water must be discarded according to the official regulations.

6 – Accidental release measures

6.1 Personal precautions, protective equipment and emergency procedures

Personal precautions: It is recommended to use protective gloves (protection according to EN374). Use work uniform. Avoid contact with eyes, skin and mouth.

6.2 Environmental Precautions

Restrain spreading of contaminated water/fire-extinction water. Do not allow it to enter the sewage system and contaminate superficial and underground waters.

6.3 Methods and materials for restriction and cleaning

Methods for cleaning up: In case of leakage absorb with a suitable, inactive absorbent material. Sweep. Transfer the waste in suitable (labeled) containers for obliteration. Clean well the whole area with plenty of water.

6.4 Reference to other sections

More information in sections: 7 for handling, 8 for personal protection and 13 for disposal.

7 – Handling and Storage

7.1 Protections for safe handling

Recommendation for safe handling: Provide adequate ventilation. Avoid contact with eyes and skin. Handle in accordance with good industrial hygiene and safety practices. Wash your hands thoroughly after handling.

Recommendation for fire prevention and explosion protection: No special precautions are required for fire prevention.

7.2 Safe storage conditions, including possible non-compatibilities

Storage and packaging requirements: Store the product with its label on it, tightly closed. Store the product in a cool, dry and well-ventilated place. It must be stored separately from food. It is not a hazardous product if transferred according to the proper rules of transport (P405), (P403+P233).

Storage recommendation: the product should be stored separately from food.

Issue date: 26/8/2018
3rd edition

Other clues: It is not a hazardous product if transferred according to the proper rules of transport.

8 – Exposure Control

8.1 Control parameters

Components with occupational exposure limit values

Not known occupational exposure limit values.

8.2 Exposure controls

Individual protection measures:

Eyes/face protection: Use appropriate protective glasses (EN166)

Hands protection: It is recommended to use appropriate protective gloves when using the product (The selected protective gloves must satisfy the specifications of EU Directive 89/689/EEC and the standard EN 374 deriving from it).

Respiratory system protection: Be sure to work in well ventilated area. In case inhalable dust is formed, you should use a dust protective filter mask (EN 143 or 149, type P1 or FFP1).

Personal hygiene measures: Avoid contact with eyes, skin and clothing. The use of self-contained work uniform is recommended. It is not allowed to drink or smoke or use smoke in the working area. Work clothes should be stored away from foods and drinks. Handle in accordance with good industrial hygiene and safety practice.

Environmental exposure controls: Prevent the material from entering the sewage system.

9 – Physical and chemical properties

9.1 Basic physical and chemical properties information

Form:	Liquid
Color :	Green
Odor :	Mold odor
pH (21°C):	10
Boiling point:	99°C
Melting point:	4°C
Flammability temperature:	Not flammable
Flash point:	>>
Vaporization rate:	The product is not volatile
Flammability:	Not combustible
Lower explosion limit:	Not applicable
Upper explosion limit :	>>
Vapour pressure:	Same as water
Density (21°C):	1.24 g/ml
Solubility:	100% water soluble (25°C)
Oxidizing properties:	Not oxidizing
Viscosity:	3-35 cps

9.2 Other information

10 – Stability and reactivity

Stable product under the recommended handling and storage conditions (section 7).

10.1 Reactivity

Stable product

10.2 Chemical Stability

Stable product under the recommended handling and storage conditions (section 7).

10.3 Hazardous reactions possibility

Not known.

10.4 Conditions to avoid

Extreme temperatures and incompatible materials.

10.5 Not compatible materials

Not known.

10.6 Hazardous decomposition products

In case of fire hazardous gases, such as carbon dioxide, carbon monoxide, ammonia, aldehydes, hovering particles and several organic compounds may be formed.

11 – Toxicological information

11.1 Information about toxicological effects

The product has not been tested. The information arises from the hazardous properties of the individual ingredients, considering cut-off values, generic or specific concentration limits, applying cumulative methods and using multiplying factors when required.

Acute toxicity

Inhalation: There is no information about the product.

Swallowing: >>

Skin contact: >>

Eye contact: >>

Irritating Effect

Inhalation: There is no information about the product.

Swallowing: >>

Skin contact: >>

Eye contact: >>

Chronic toxicity

Carcinogenicity: There is no information about the product.

Mutagenicity: >>

Teratogenic potential: >>

Effects on growth: >>

Effects on fertility: >>

Other relevant information regarding toxicity

From the individual components of the product, it appears that contact with the product may cause slight eye irritation. Also, repeated skin exposure can cause skin irritation.

Oral LD50 oral = No data available,

LD50 skin = >>

Effect on the eyes: No corneal or iridescent effects are observed at a dose of 0.1 ml. In rabbits it can cause irritation.

Effect on swallowing: Not toxic, may cause irritation
Skin effect: Moderate irritation, reversible within 7 days

12 – Ecological information

12.1 Toxicity

Evaluation of the toxicity in aquatic environments: It is very likely that the product does not demonstrate acute toxic effect on aquatic organisms. These declarations derive from the hazardous properties of the single ingredients, as well as from their concentrations in the mixture.

Toxicity on fish: The product has not been tested.

Toxicity on daphnias and other aquatic invertebrates: The product has not been tested.

Toxicity on aquatic plants: The product has not been tested.

Microorganisms/ Effects on activated silt: No hampering of the degrading ability of the activated silt is expected when the product enters biological purification premises at adequately low concentrations. The product has not been tested.

Long-term toxicity on fish: The product has not been tested.

Long-term toxicity on aquatic invertebrates: The product has not been tested.

Earth-toxicity estimation: The product has not been tested.

12.2 Persistence and degradability

No information available.

12.3 Bioaccumulation potential

The product has not been tested. No bioaccumulation is expected in organisms. It is expected to be rapidly absorbed from the soil and biodegraded by microbial activity.

12.4 Results of PBT and vPvB assessment

The product does not meet the criteria in order to be classified as PBTs (persistent, bioaccumulative and toxic) and vPvBs (very persistent and very bioaccumulative), since the single ingredients do not meet the criteria.

12.5 Other negative effects

The product does not contain substances which are referred in the regulation (EU) 1005/2009 as relevant to the substances which destroy the ozone layer.

13 – Information regarding disposal

13.1 Waste handling methods

Product: Chemical waste material must be disposed according to the directive 2008/98/EC about wastes as well as to the relative national regulations.

Packages with remaining product: Packages must be disposed according to the special regulations of each country or must be returned to packages recycling entity (P501).

14 – Transform information

	14.1. UN Number	14.2. Familiar expediti on name accordin g UN	14.3. Danger order/orders during transportatio n	14.4. Packaging group	14.5. Environmental hazards
Land transport ADR /RID	-	-	-	-	-
Sea transport ADN	-	-	-	-	-
Sea transport IMDG	-	-	-	-	-
Air transport IATA/ICAO	-	-	-	-	-

14.6 Special precautions for the user

Not known.

14.7 Transportation of bulk material according to Appendix II of MARPOL contract 73/78 and of code IBC.

Not applicable.

15 – Regulatory information

This MSDS complies with the Regulation No 1907/2006/EU (REACH) & the Regulation (EU) No.1272/2008 [CLP].

15.1 Regulations/ legislation concerning safety, health and environment about the substance or the mixture

This product is labeled according to EU directives.

15.2 Chemical safety evaluation

There has not been conducted a chemical safety evaluation by the supplier according to Regulation No 1907/2006/EU (REACH). The product is evaluated according to NFPA & HMIS.

16 – Other information

The Safety data sheet should be used in combination with the technical documentation of the product. The Safety data sheet is prepared based on information collected up to the day that the Safety Data Sheet is written. It is a guide for the safe use, distribution, storage and transport of the product and it does not intend to provide any warning or

Issue date: 26/8/2018

3rd edition

detailed description. This information is relevant only for the product. If the product is combined with other material or in procedures other than the ones described this

safety data sheet may not be applicable. The Safety data sheet meets the risk criteria of the Regulations of the Tested Products according to the directives of the European Union.
